

Day-4 Dynamic Frontend Component

[Nike Marketplace]

Focus on designing and developing modular, reusable frontend components to display marketplace data dynamically using Sanity CMS or APIs.

By : Mohammad Danish

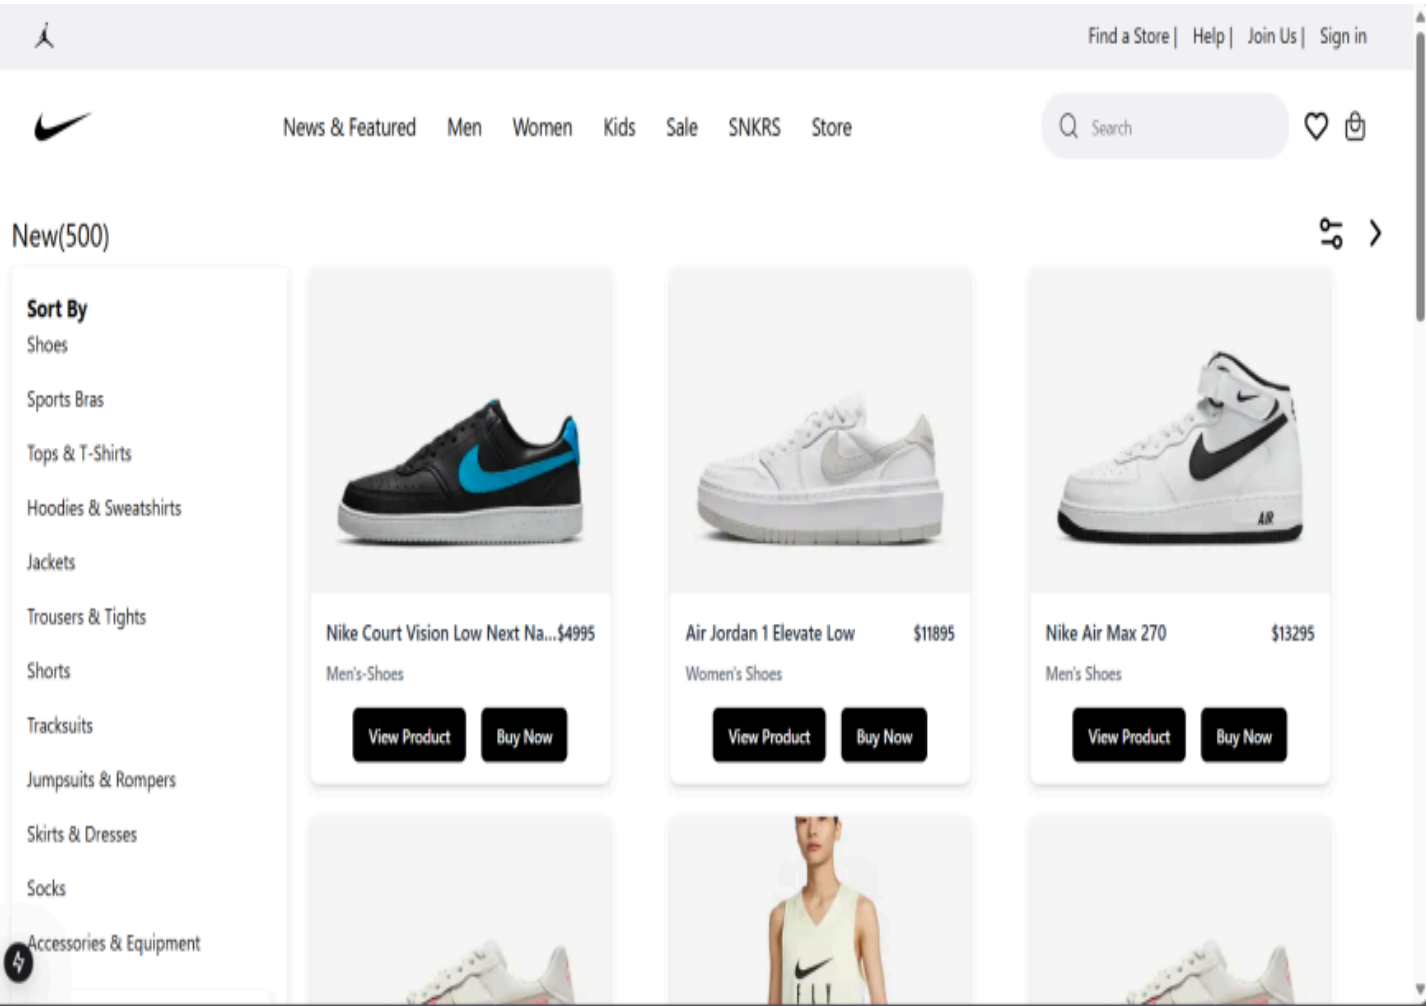

ID : 00037323

Components:

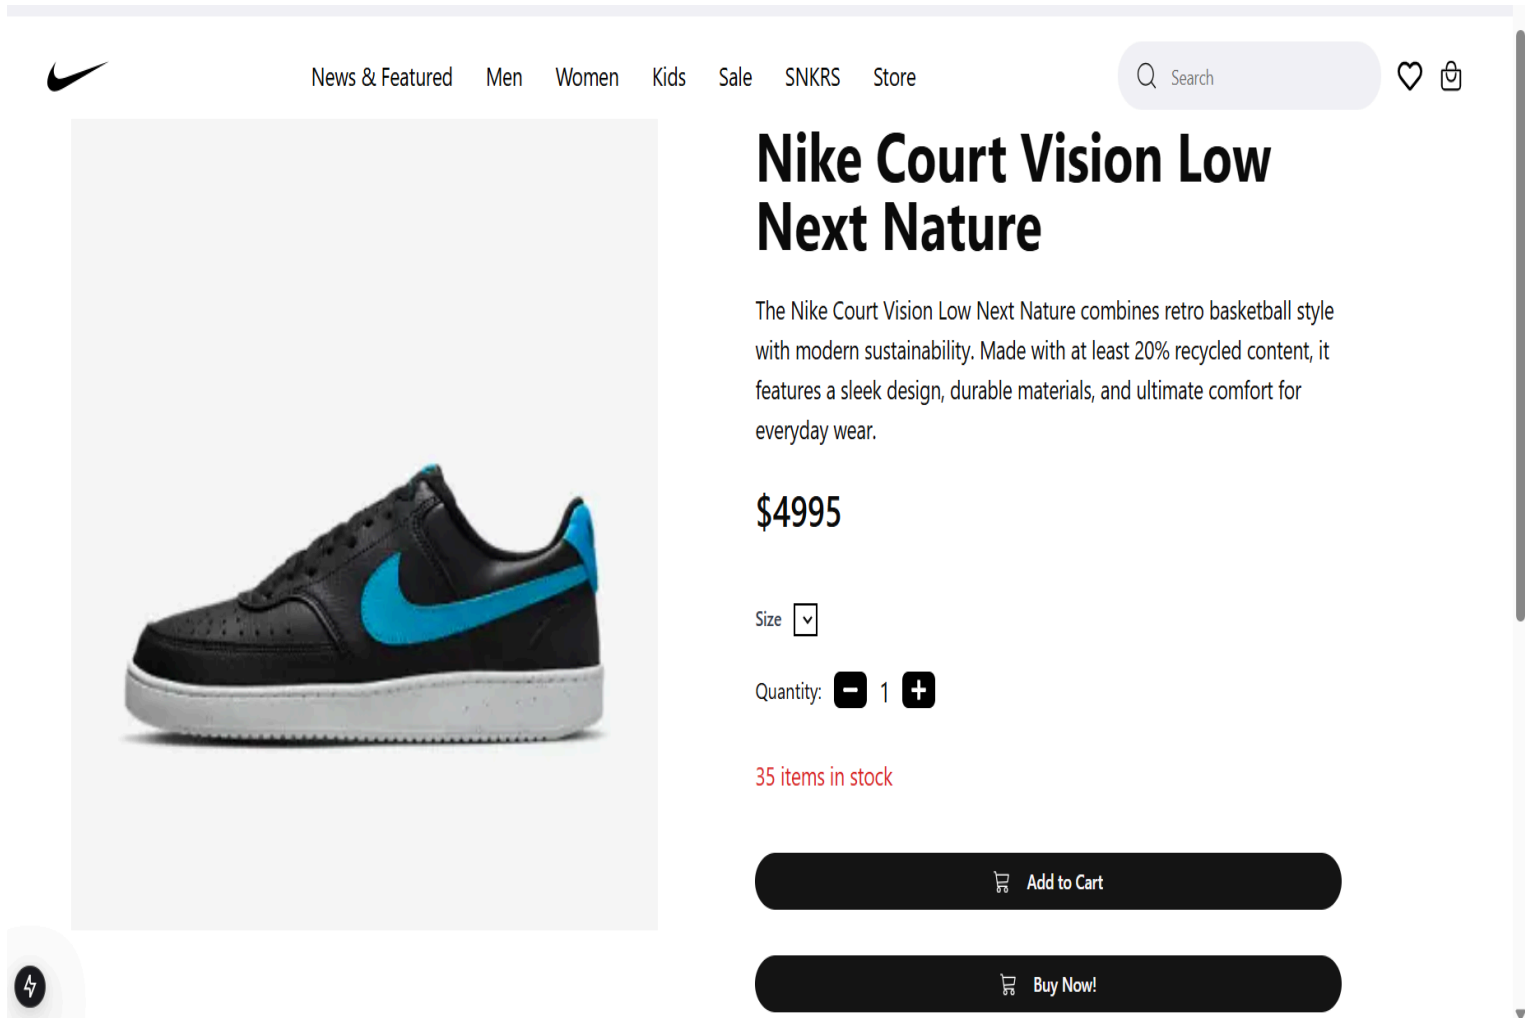

1. Product Listing Component :

This is the Product Listing Page, where all products are dynamically displayed in an interactive and responsive layout. Each item is fetched in real-time, ensuring an up-to-date and seamless browsing experience.

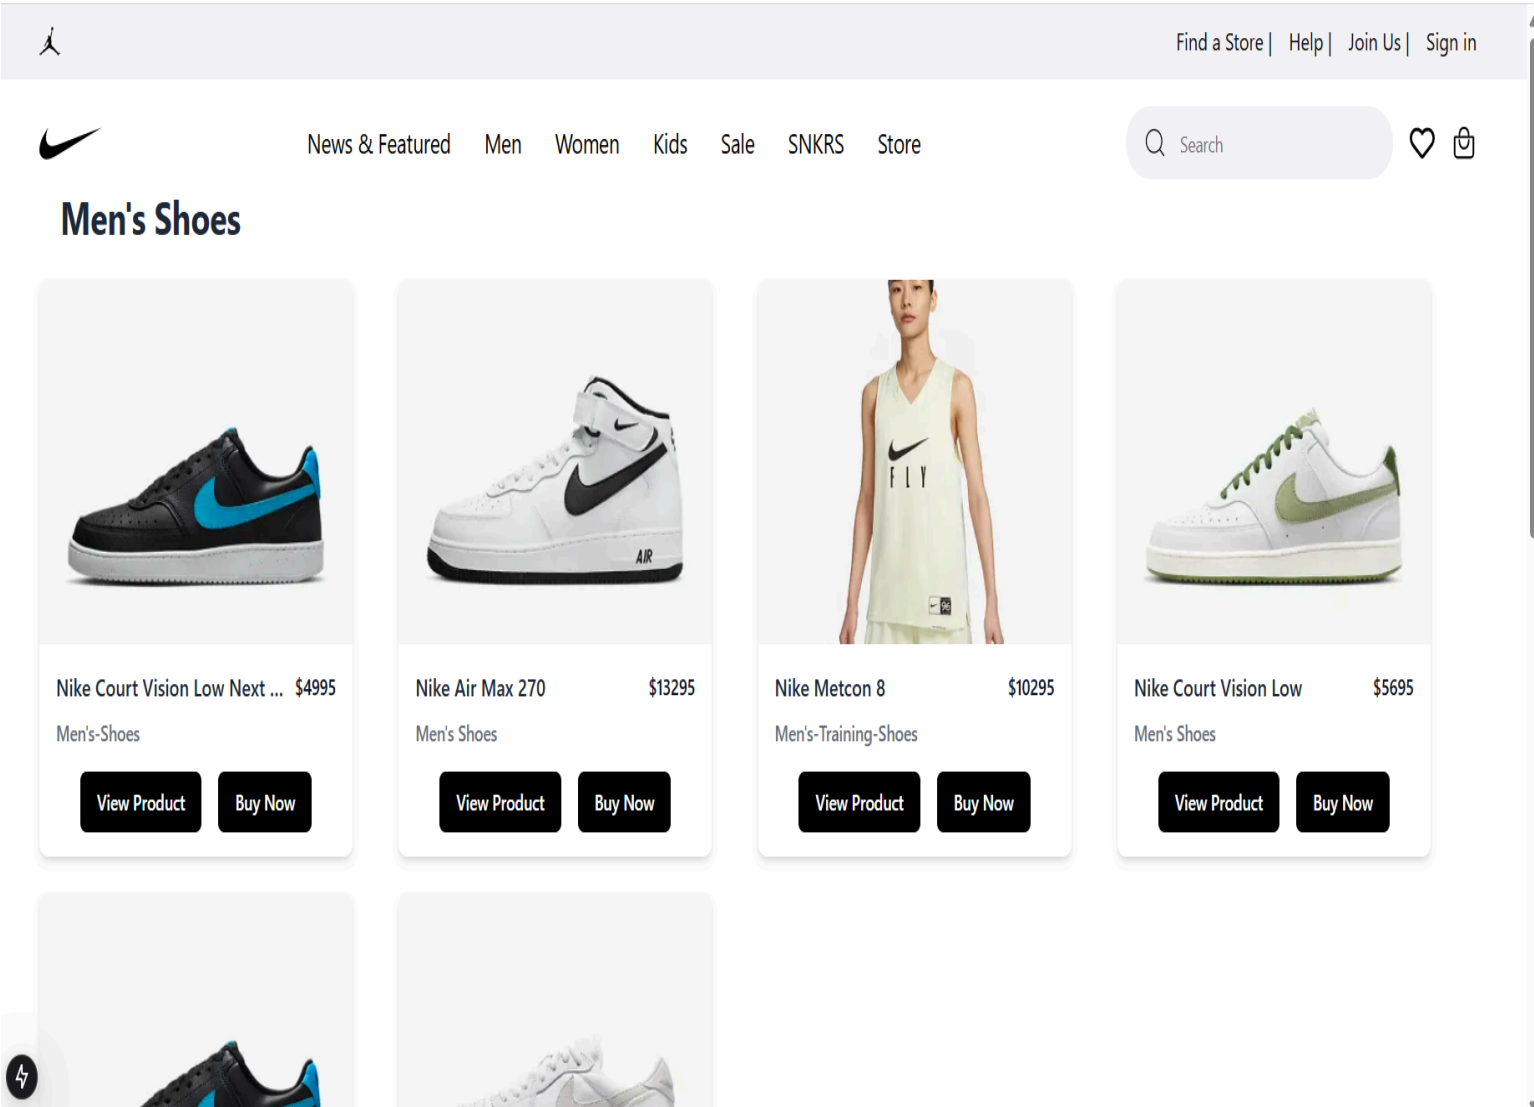

2. Product Detail Page (slugPage).

This is the product's dynamic slug page, which loads specific details whenever you click on a product. It ensures a seamless navigation experience by fetching real-time data for each item.

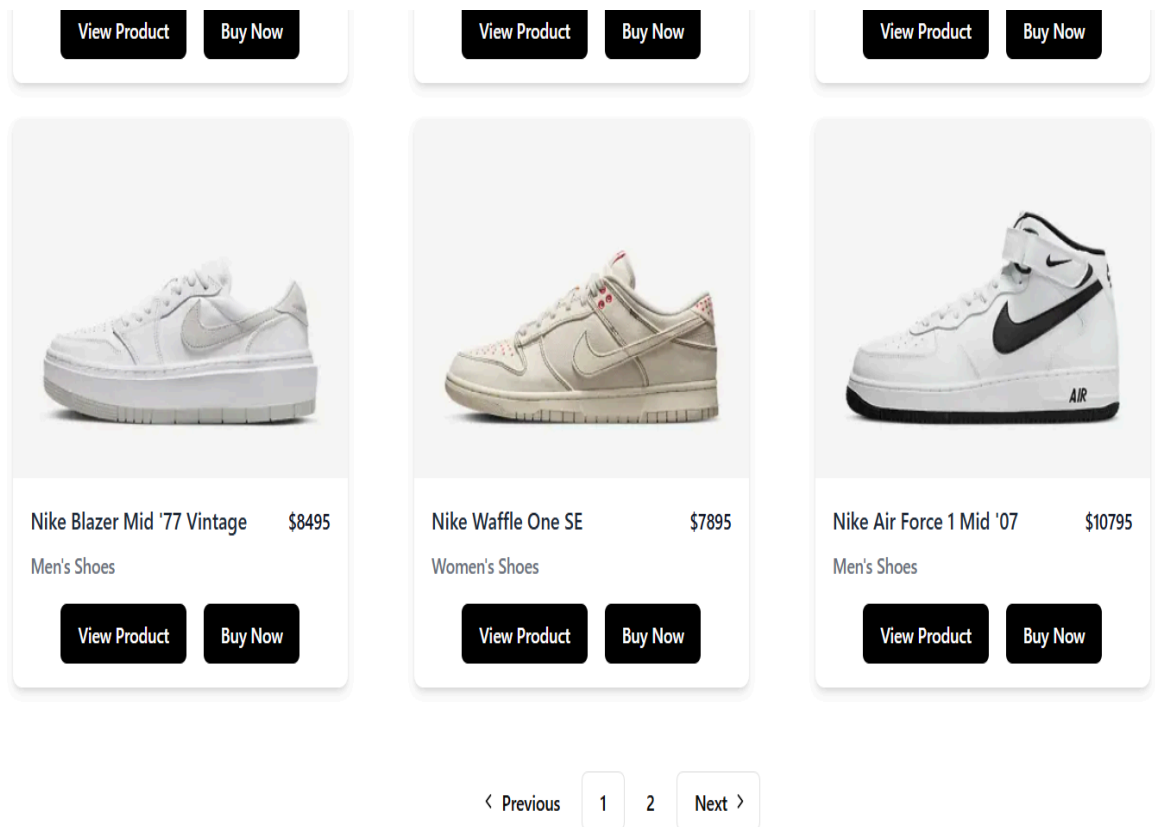

3.Category Page.

Here, products are dynamically filtered based on categories such as "Men's Shoes" and "Women's Shoes." This feature enhances user experience by allowing quick and easy navigation to the desired products.

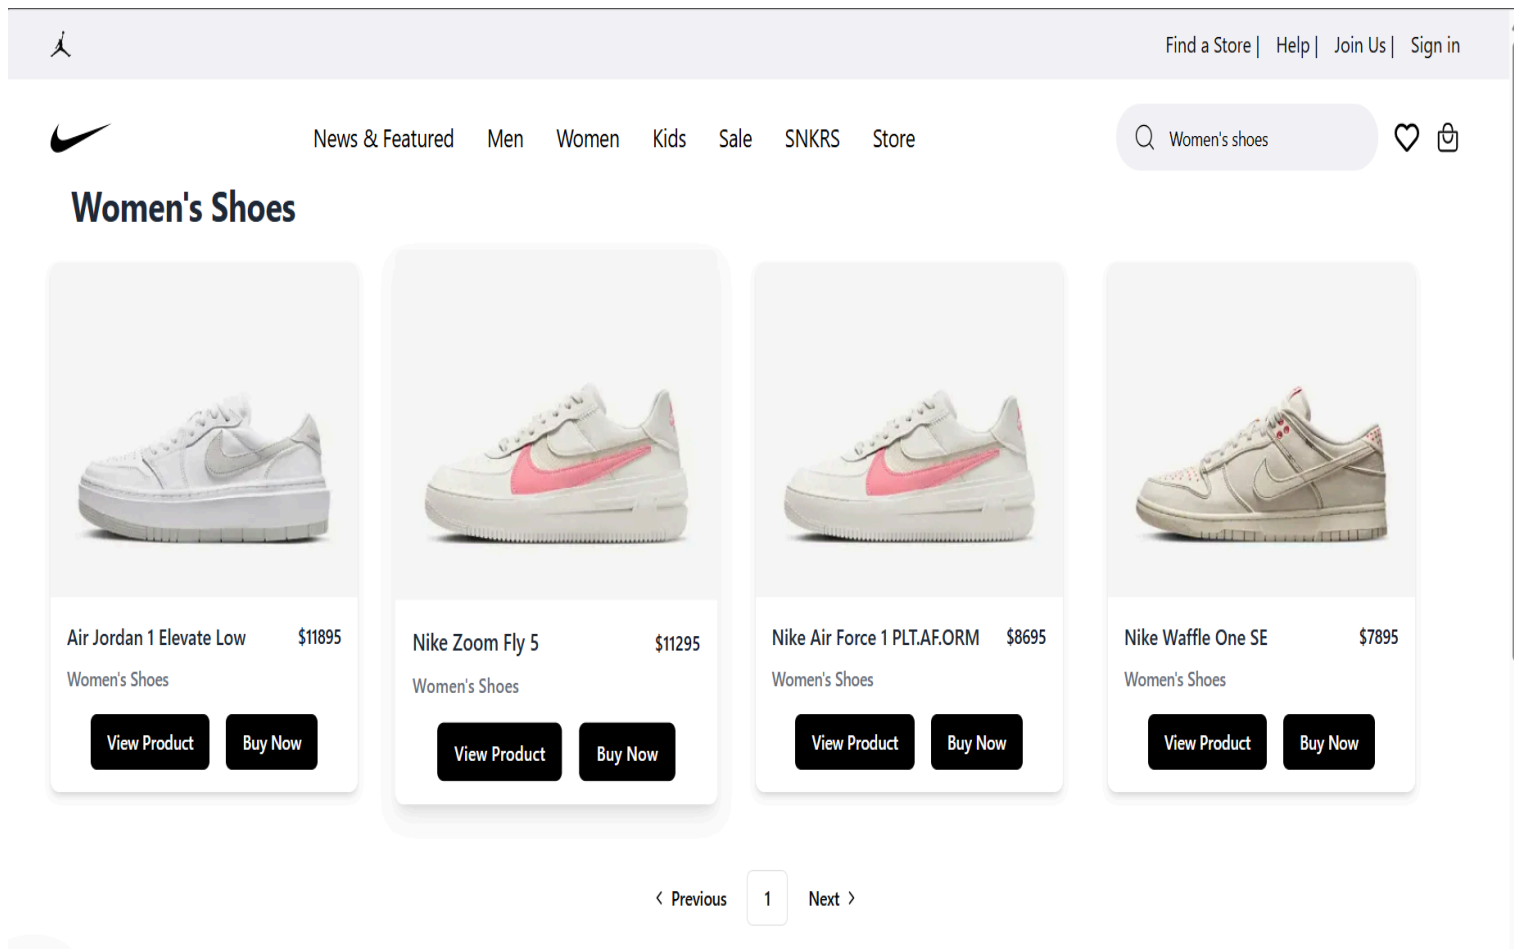

4.Pagination Component.

The Pagination Component ensures a smooth browsing experience by displaying only 12 products per page. To explore more products, users can navigate through pages effortlessly, improving performance and usability.

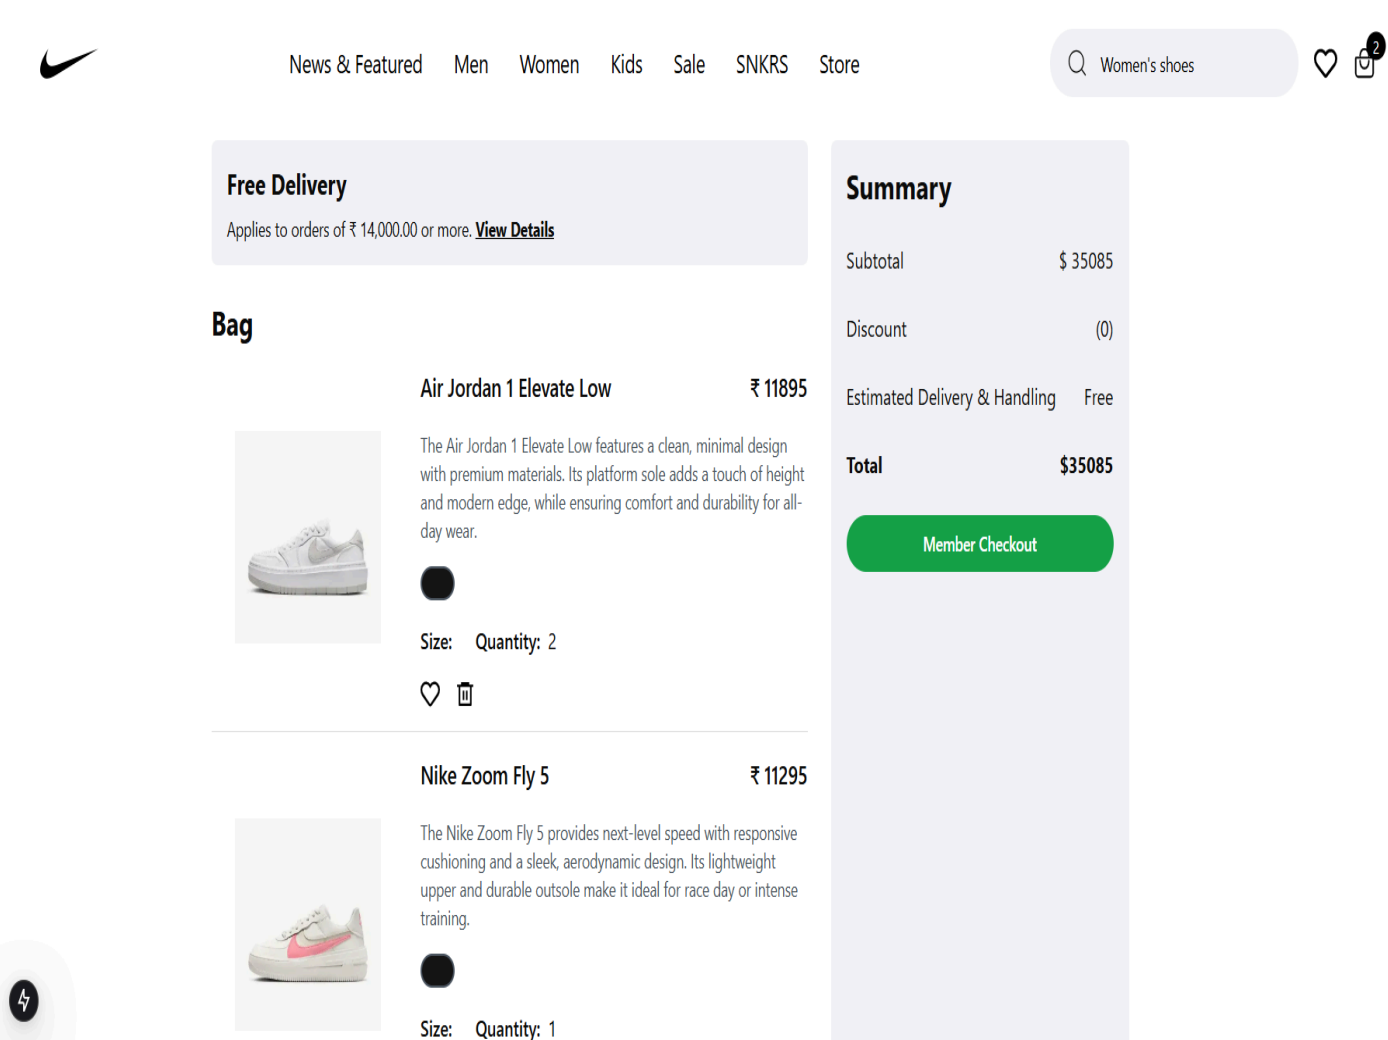

5. Search Bar Component.

This is a functional search bar that allows you to search for products by their names and categories, making it easier to find what you need quickly and efficiently.

6.Cart Page.

This page serves as your shopping cart, providing a comprehensive overview of the items you've added. Here, you can meticulously examine the selected products, confirming details such as the specified quantity, chosen color, size, and any other relevant attributes. After carefully verifying the contents of your cart, you can confidently proceed to the checkout process to finalize your purchase.

7.Check Out Page.

Upon proceeding from the shopping cart, you will be directed to this page where you can securely provide your address and contact information. This data, along with the details of your selected products, will be securely stored within our Sanity database.

How would you like to get your order?

Customs regulation for India require a copy of the recipient's KYC. The address on the KYC needs to match the shipping address. Our courier will contact you via SMS/email to obtain a copy of your KYC. The KYC will be stored securely and used solely for the purpose of clearing customs (including sharing it with customs officials) for all orders and returns. If your KYC does not match your shipping address, please click the link for more information.[Learn More](#)

 Deliver It

Enter your name and address:

Mobile Header>

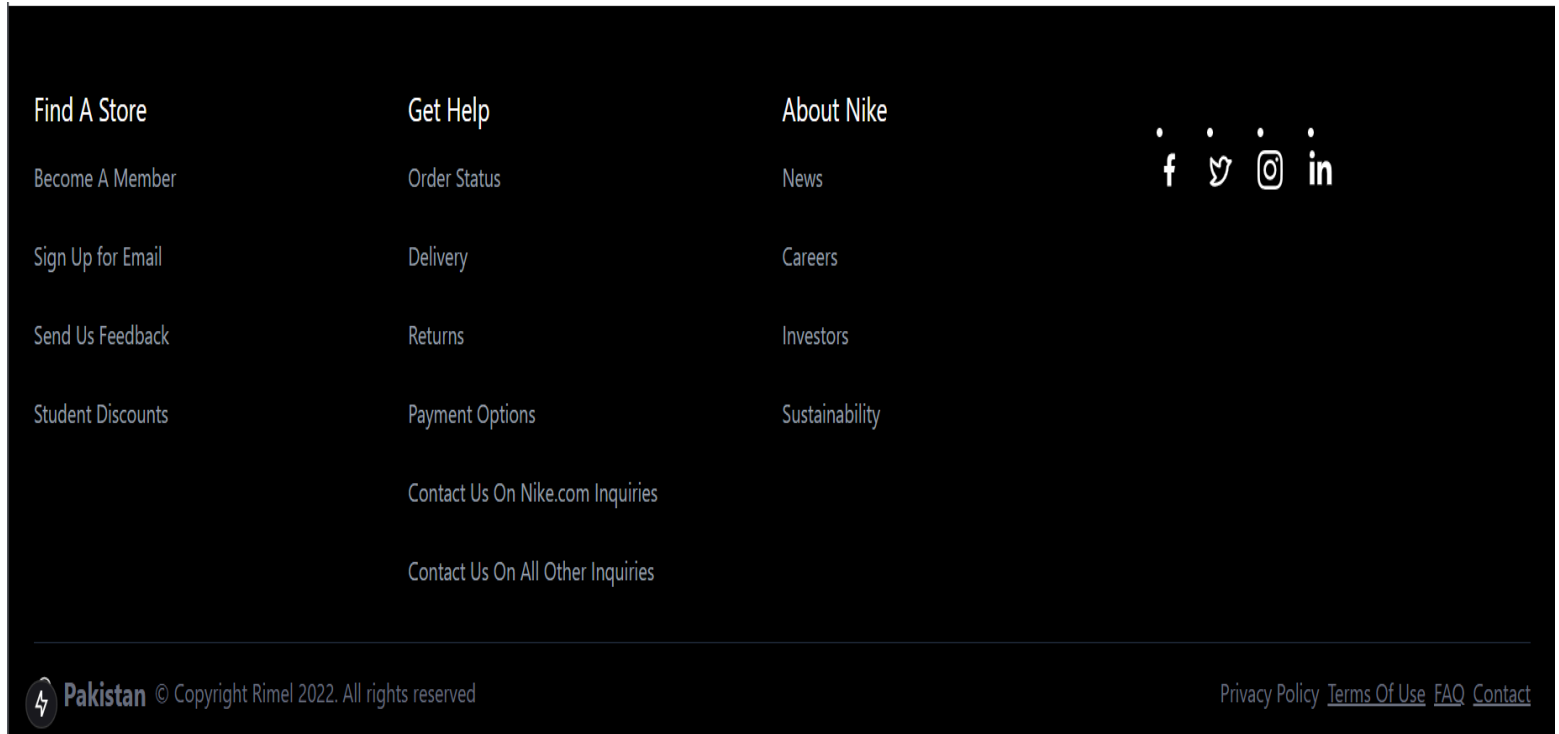

[Find a Store](#) | [Help](#) | [Join Us](#) | [Sign in](#)

10.Footer Component.

The footer component contains links to important resources, including "Contact Us," social media platforms, "Get Help," and other relevant pages.

11.Best Selling Component.

This section showcases our best-selling and trending products. Dynamically updated every two seconds, it provides a continuous stream of our most popular items.

Best of Air Max

Shop

Nike Zoom Fly 5 \$11295

The Nike Zoom Fly 5 provides next-level speed with responsive cushioning and a sleek, aerodynamic design. Its lightweight upper and durable outsole make it ideal for race day or intense training.

FAQs

Does my card need international purchases enabled?
Yes, we recommend asking your bank to enable international purchases on your card. You will be notified at checkout if international purchases need to be enabled.
Please note, some banks may charge a small transaction fee for international orders.

Can I pay for my order with multiple methods?
No, payment for Nike orders can't be split between multiple payment methods.

What payment method is accepted for SNKRS orders?
You can use any accepted credit card to pay for your SNKRS order.

Why don't I see Apple Pay as an option?
To see Apple Pay as an option in the Nike App or on Nike.com, you'll need to use a compatible Apple device running the latest OS, be signed in to your iCloud account and have a supported card in your Wallet. Additionally, you'll need to use Safari to use Apple Pay on Nike.com.

Ending.

Wrapping up this project has been an incredible journey! I have truly enjoyed every moment of designing and building these dynamic frontend components. This project has not only strengthened my skills but has also fueled my enthusiasm for creating scalable and interactive user experiences. But this is just the beginning! I am still working on it, continuously refining and upgrading my work to enhance functionality and performance. There's so much more to come, and I'm excited about the future updates and improvements. Stay tuned for what's next—this journey is far from over!
